

Editor's Comment:

The whole manuscript needs to be overhauled as majority of the information provided were without required and relevant sources as expected of a scholarly paper submitted for consideration for publication in any esteemed journal of international reputation. For example, the documents used to analyze the information on African unity (as stated in the abstract) should be cited in the main text. In effect, the author needs to cite the sources of information for the following information raised in the text:

1. The first paragraph for the introduction
2. Historical Emergence of African unity
3. Formation of African Unity
4. Citation for failures not complete. Some have sources others do not. needs to work on that
5. Advent of African Union
6. Vision of African Union
7. Achievements
8. Current challenges

B. Also the following cited sources were not found in the references:

1. Toyo (2001)
2. Frank, 1969
3. Kankwenda, 2002
4. Tendon, 1998
5. Azikiwe, 1973

C. The following stated in the references were not found in the text:

1. Ozo-Eshon & Ukiwo (2001)

D. Needs to clarify the following:

1. Which is which ? .Ake 2001 in text or Ake 1994 in ref. or they are separate? Clarify.
2. Which is which? is it Nwankwo or Nwakwa as stated in the references.

The author needs to revisit the paper by addressing the issues raised above. In addition, the author also needs to synthesize most of the tabulated information on African Unity.
