

## SDI FINAL EVALUATION FORM 1.1

### PART 1:

Journal Name:	<a href="#">Biotechnology Journal International</a>
Manuscript Number:	Ms_BJI_35030
Title of the Manuscript:	Production of raw starch degrading amylase by <i>Bacillus subtilis</i> TLO3 and its application in bioethanol production using starch-rich flours
New Title of the Manuscript:	Effect of <i>Bacillus subtilis</i> TLO3 amylase pre-treatment on ethanol production from raw starches
Type of Article:	Original Research Article

### PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<p>Some important topics must be revised. The text need a revision. In page 3, line, 72 pH 6.8 (v/v). Lines 80, 81, 116-118, v/v ou w/v?</p> <p>I would like suggest that the authors demonstrate in a comparative analysis the amylase production values by <i>B. subtilis</i> strain.</p> <p>The references must be revised.</p>	<ul style="list-style-type: none"> <li>• Remarks about lines 72-80-81-116-118 were corrected.</li> <li>• This is a very good suggestion. However it may be realized in another study given that this study focuses only on amylase hydrolysis effect for ethanol production.</li> </ul>
