

SDI Review Form 1.6

Journal Name:	British Journal of Mathematics & Computer Science
Manuscript Number:	2014_BJMCS_13849
Title of the Manuscript:	HALL CURRENT EFFECTS ON UNSTEADY MHD FLUID FLOW WITH RADIATIVE HEATFLUX AND HEAT SOURCE OVER A POROUS MEDIUM
Type of the Article	Original Research article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments		
<u>Minor</u> REVISION comments	Authors have thoroughly investigated the Hall Current Effects on Unsteady MHD Fluid Flow with Radiative Heat Flux and Heat Source over a porous medium. Overall, it has been well written. I recommend the publication of this article after minor revision. Followings would be helpful in revising the manuscript: 1. There is no detailed discussion about Hall current parameter, m . Could you add some description about that? 2. Could you add a schematic to the revised version, with describing a graphical description of system?	Thank you for commending the work. I only try to avoid too much graphs, that is why it is restricted to two graphs.
<u>Optional/General</u> comments
