SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Compulsory REVISION comments	Ethical Issue- Yes, the ethical issues are there. As the most of the work in terms of research undertaken, research carried out and the results matches highly with following thesis.	
Minor REVISION comments		
Optional/General comments	The Research Paper is NOT RECOMMENDED for Publication because the work which is being performed in this paper highly matches the work which is already done and the results are same as in the following thesis: http://kubanni.abu.edu.ng:8080/jspui/bitstream/123456789/5398/1/Empirical%20Performance%20Analysis%20of%20Parallel%20Programs%20on%20Wired%20and%20Wireless%20Local%20Area%20Networks.pdf	This is interesting, I am the author of the research work whose link you have just made reference too. The co-authors and both supervisors of the said work. I wasn't aware it was included in the repository of Ahmadu Bello University because I was not informed. Also, since it is a reposition and not a formal publishing house. Therefore, I think I reserve the right to publish the work as it is my original work. As a confirmation, download the thesis work and take a close look at the author(Charles Isah Saidu), it should tally with the author of the submitted paper. Thank you for your observation, I am actually very happy about this.
