

SDI Review Form 1.6

Journal Name:	British Journal of Mathematics & Computer Science
Manuscript Number:	Ms_BJMCS_21820
Title of the Manuscript:	New fourth-order Schroder-type methods for finding zeros of nonlinear equations having unknown multiplicity
Type of the Article	

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments		
<u>Minor</u> REVISION comments	The manuscript is correct and precise. We only recommend that the proofs of theorems 1 and 2 should be more explicit. The details should be written.	I have added the essential expressions and omitted the others because they are tedious, to display. Furthermore, I have shown the important error equations.
<u>Optional/General</u> comments
