

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	British Journal of Mathematics & Computer Science
Manuscript Number:	2014_BJMCS_10620
Title of the Manuscript:	Combined Solitary Wave Solutions in Higher-order Effects Optical Fibers

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
I have read the revised article carefully. The previous evolution is not followed by the author('s). Moreover, in references author should strictly follow the style of this journal (BJMCS). All the equation numbers are outside the right margin, it needs some corrections. In section "3. Results and Discussion-line no. 115": Under this section, Author discussed subsection '3.1 Single solitary wave solution' in line number 117, then subsection '3.2 Solution of the form' in line number 151, and then again in line no. 186 Author('s) discussed subsection '3.1 the solution of the form'. (3.1 repeated) In my previous evolution I have commented to change all the equation(1) etc. by eq. (1). But the Author('s) does not follow this instructions completely. I have highlighted some of the errors by red color. Again I would like to say that Author('s) should include more recent works with correct citation including doi number if any. Follow my previous and current comments. I am agree to review this article again.
