**General guideline for Peer Review process:**

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

**PART 1: Review Comments**

|                                            | Reviewer's comment                                                                                                                                                                                                                                                                                     | Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
|--------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b><u>Compulsory</u></b> REVISION comments | The work is interesting and relevant. The paper deals with a variety of interesting tasks associated with the concept of A-cordial labelling graph, where $A = \langle \mathbb{Z}_k, +_k \rangle$ is additive group of modulo k. The proof of the main result is correct and mathematically well done. |                                                                                                                                                                               |
| <b><u>Minor</u></b> REVISION comments      | I would recommend to indicate some applications of the results.                                                                                                                                                                                                                                        |                                                                                                                                                                               |
| <b><u>Optional/General</u></b> comments    | I recommend accepting the paper for publication.                                                                                                                                                                                                                                                       |                                                                                                                                                                               |
