

SDI Review Form 1.6

Journal Name:	<u>British Journal of Mathematics & Computer Science</u>
Manuscript Number:	Ms_BJMCS_21930
Title of the Manuscript:	A Mathematical Model For The Control Of The Spread Of Ebola Virus Disease In West Africa –Disease-free Equilibrium Approach.
Type of the Article	

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	Ebola hemorrhagic fever is marked by high mortality in human and nonhuman primates. Recently, the biggest outbreak occurred in West Africa with significant mortality. In this manuscript, a mathematical model is present to potentially control the disease. A well-documented introduction is presented, and the manuscript is well written. Methods are sufficient explained to replicate the research. The discussion section needs to be improved and similar studies should be included. References cited have a high relevance to the problem. The list needs some attention according to journal instructions. A sentence about the aim of the study should be included in the manuscript.	
<u>Minor</u> REVISION comments	Line 227, Replace "Tuberculosis" with "Ebola"	
<u>Optional/General</u> comments
