

SDI Review Form 1.6

Journal Name:	British Journal of Mathematics & Computer Science
Manuscript Number:	Ms_BJMCS_22192
Title of the Manuscript:	BAYESIAN APPROACH TO PREDICT OFFENDER'S PROBABLE ANCHOR POINT USING GEOGRAPHIC PROFILING SYSTEM IN AKURE, NIGERIA
Type of the Article	

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	1- Authors should justify the selection of the distance decay and the buffer zone variables to expand existing geographic profiling systems. 2- Authors should define clearly the terms distance decay and buffer zone within the paper context. 3- In section 3, the contribution of integrating the decay and the buffer zone variables is not clear. Author should clarify their contribution through development of the system. 4- In section 4, authors should show the efficiency of integrating the decay and the buffer zone variables to the results. Or they may have a separate discussion section presents the efficiency of their contribution to the results.	
<u>Minor</u> REVISION comments	1- The related references are quite old. It is recommended to involve latest research and applications to develop more reliable system. 2- All formulas in the paper are missing 3- Correct the sentence "It was ensure that there is be no other information in the file".	
<u>Optional/General</u> comments	Discuss the limitation of the work.
