| <b><u>Minor</u></b> REVISION comments      | Article english language should be improved.<br>Grammatical correction of the article is required.<br>Article needs to be re-edited and formatted.<br>Correction of abbreviations is required.<br>Keywords should be clear and need to be modified.<br>References should be in one standard format.                                                                                                                        | The whole paper's English grammar and spelling have been checked and re-edited. A number of corrections have been made. The keywords have been modified; and the whole paper including references section has been re-formatted following the journal's standard format. |
| <b><u>Optional/General</u></b> comments    | The article represents a novel contribution to the analysis of large size data sets with efficient and robust combination of algorithm and visualization techniques. Title and propositions are stated good with well reasoning to the problem under consideration.<br>I suggest if the author of the article includes a section of "Results and Discussion" which shows comparison of the results of both the techniques. | Thanks. A section of Summary and Discussion has been added before References section.                                                                                                                                                                                    |
