

SDI Review Form 1.6

Journal Name:	British Journal of Mathematics & Computer Science
Manuscript Number:	Ms_BJMCS_23433
Title of the Manuscript:	RFID AND RTLS-BASED HUMAN RESOURCE MONITORING SYSTEM
Type of the Article	Original Research Articles

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments		
<u>Minor</u> REVISION comments	The journal needs to specify why this device is better than the one already in existence. I believe similar projects are done and why is the better than others.	To the best of my knowledge, existing systems used for tracking human resources do not have the features of the proposed system such as online tracking, detailed movement statistics and the use of passive RFID technology which makes it simple, less bulky and power efficient.
<u>Optional/General</u> comments	The research paper is appropriate to the demand in identifying in arrival and departure time of personnel in real time.
