SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments	Abstract of the manuscript is too short. It is necessary to expand it so that it will contain a brief description of the content of the paper, methods used, results obtained and conclusion. I can recommend to the authors to add one or two key words. The introduction of the paper would not contain any formulas, but relatively wide research of already known knowledge of the issue and the reason for the research in this problem. The manuscript has not any conclusion. It is necessary to separate clearly already known knowledge in this problem and to point out own contribution of the authors.	It has been taking into consideration all the suggestions of Reviewer and working out with thanks.
<u>Minor</u> REVISION comments	Some formulas exceed the margins of the page.	It has been corrected.
<u>Optional/General</u> comments
