PART 1: Review Comments

	Reviewer's comment	**Author's comment** *(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)*
Compulsory REVISION comments	**Lemma-3.1 -** The statement of the lemma seems to be vague or not clear. Rewrite it in a clear and meaningful way. There are errors in its proof also. Entries in the references must be written in a uniform manner. Similar pattern should be followed to write the names of authors.	We have changed the statement and the proof of theorem 3.1. This is Highlighted in Blue color. We have also corrected the references to have a similar pattern as suggested.
Minor REVISION comments	A minor language editing is desirable for this document.	Language editing has been done and is highlighted in red.
