SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments		
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments	There is an increasing interest in this type(s) of numerical methods. Even most of the published papers (on this topic) use the same arguments, in my opinion, the method can be considered as new and the proofs are seem to be correct. As the content fits into the journal's scope, I do recommend its publication.	Thanks
