

SDI Review Form 1.6

Journal Name:	British Journal of Mathematics & Computer Science
Manuscript Number:	Ms_BJMCS_24352
Title of the Manuscript:	On Rings where Certain Subsets are Multiplicatively Generated by Idempotents
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments		
<u>Minor</u> REVISION comments	Line 49: "Theorem 1" should be put in boldface	Corrected (in yellow)
<u>Optional/General</u> comments	Line 59: Use $e_1 e_2 \cdots e_n$. That is, centre the dots. Throughout the article. Line 97: $xy - yx \in J$, not φ Line 168: Theorem 3 states that a ring of this particular kind, minus its commutator, is commutative. Make sure this is the precise meaning of the result (but as such, it is nice).	Changed (in yellow) as much as possible. $R \setminus C$ is the ring minus the center.
