

SDI Review Form 1.6

Journal Name:	British Journal of Mathematics & Computer Science
Manuscript Number:	Ms_BJMCS_24714
Title of the Manuscript:	Numerical Solution of Fourth Order Linear Differential Equations by Adomian Decomposition Method
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments		
<u>Minor</u> REVISION comments	1. Rewrite the abstract as: In this paper, we present the general Adomian Decomposition Method (ADM) for handling fourth order linear differential equations. We obtain analytic solution in a rapidly convergent series to this class of equations. The concept of ADM was further applied to physical problems and the result showed excellent potentials such method. 2. For the conclusion: rewrite the first line as: In this paper, we have applied Adomian decomposition.....	1. There is no difference between what the Reviewer is suggesting and the abstract of the article. 2. The present conclusion is same as what the Reviewer is suggesting.
<u>Optional/General</u> comments
