

SDI Review Form 1.6

Journal Name:	British Journal of Mathematics & Computer Science
Manuscript Number:	Ms_BJMCS_24872
Title of the Manuscript:	DEMAND RESPONSIVE TRANSPORTATION SERVICE PROBLEM WITH TIME WINDOWS
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments	Interesting paper but written in reverse order of importance. The core of the paper must be the mathematical model that must described and presented in an abstract way. Then the practical situation must be presented as an example. Even the author recognizes that the model is the most important being possible to generalize it and apply to diverse situations. Another example, more complex, should be added.	A practical study has been done based on the mathematical models used. Assumptions were made when applying the model. Another example will be demonstrated in a different research paper.
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments
