

### SDI Review Form 1.6

|                          |                                                                                                                       |
|--------------------------|-----------------------------------------------------------------------------------------------------------------------|
| Journal Name:            | <a href="#">British Journal of Mathematics &amp; Computer Science</a>                                                 |
| Manuscript Number:       | <b>Ms_BJMCS_25673</b>                                                                                                 |
| Title of the Manuscript: | <b>Note on "Mean square solution of second-order random differential equations by using homotopy analysis method"</b> |
| Type of the Article      | <b>Original Research Article</b>                                                                                      |

### **General guideline for Peer Review process:**

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

### **PART 1: Review Comments**

|                                            | <b>Reviewer's comment</b>                                                                                                                                   | <b>Author's comment</b> (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
|--------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b><u>Compulsory</u></b> REVISION comments | <b>In this paper, using Homotopy analysis method, the authors corrected some errors in paper [1] from references. The new solutions seem to be correct.</b> | We have followed your recommendations for the necessary corrections                                                                                                                  |
| <b><u>Minor</u></b> REVISION comments      |                                                                                                                                                             |                                                                                                                                                                                      |
| <b><u>Optional/General</u></b> comments    |                                                                                                                                                             |                                                                                                                                                                                      |
