

Editor's Comment:

I think that the title of the paper is more suitable in the form:

" Mean square solution of second-order random differential equations by using homotopy analysis method"

In other words the authors must delete the sentence " **Note on and correct the article**"

I have and some other objections:

O1 (page 100). replace the word " corrections" with improvements

O2 (page 101- in line 3). replace „are incorrect" with "are ambiguous"

O3 (page 101). replace „is to correct" with „is to improve"

O4 (page 102). replace „The norm on is denoted by" with „The norm on L_2 is denoted by."

O4 (page 111). In the section Conclusion delete the word „the" since appear of two time. In addition, I think that is more indicate to use **improve** instead of the word **correct** in all the paper. I say this because I think that in the mentioned paper from the address

http://www.rrp.infim.ro/2013_65_2/art03Golmakhaneh.pdf

can be a typing error or others factors. In addition, the authors must to concentrate on the results obtained by they as one of the reviewers say.

Author's Feedback:

Thank you for your comments on our manuscript.

We agree with Editor's Comments and have adjusted our revised text.

Also, we have substantially revised all the results again for possible typing errors.

As you suggested, we have replaced the word "correct" with "improve" in the paper. So we believe that the sentence " Note on and correct the article" may be replaced by "improve" in the title.
