

SDI Review Form 1.6

Journal Name:	British Journal of Mathematics & Computer Science
Manuscript Number:	Ms_BJMCS_27063
Title of the Manuscript:	Software Development for the Prediction of Hydrate Formation Conditions
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	This paper presents software development to predict hydrate formation condition, by which simulation of temperature or pressure to form hydrate can be obtained. 15 models of temperature or pressure are adopted, which are verified by literature experimental data. The software can be run on desktop or mobile device. The format of sentence with capital of each word needs to meet the requirement of publish format. The numbers of figure to demonstrate GUI needs to be named in caption.	All noted issues have been corrected and highlighted in the manuscript. Upper cases have been corrected and figure captions introduced.
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments
