

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	British Journal of Mathematics & Computer Science
Manuscript Number:	Ms_BJMCS_27221
Title of the Manuscript:	Effects of Hall Current and Rotation on Unsteady MHD Natural Convection Flow Past a Vertical Flat Plate with Ramped Wall Temperature and Heat Absorption
Type of Article:	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
My original comments about plagiarism remain. The authors do not seem to understand that one cannot use the wording from other authors' research papers and pass it off as one's own. THAT IS PLAGIARISM.	I am very much grateful to Reviewers comment. About plagiarism of the paper, I would like to inform you that, I have changed the line which matched the Reference paper [28] and used my own words. I would like to inform you that the equation cannot be changed, because some equation may match with others. In my case only equation of conservation of momentum matched with Reference [28], but the other equations are different with Reference [28]. So I think it will not come under plagiarism. Hope, the corrections in the Manuscript and the explanation about plagiarism will satisfy you. The corrections are highlighted with yellow colour. Hope this time I have convinced you.
