

SDI Review Form 1.6

Journal Name:	<u>British Journal of Mathematics & Computer Science</u>
Manuscript Number:	Ms_BJMCS_29890
Title of the Manuscript:	The series expansion of the Greens function of a differential operator with block-triangular operator potential
Type of the Article	Original research papers

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments		
<u>Minor</u> REVISION comments	Manuscript is very long but conclusion and references are very short. It can be given an apprehensible exam for Green function. Is expansion of Green function applied to another problems?	I agree with your comments and added a list of references, more detailed written conclusion. Since the second reviewer expressed the observation that the introduction is short, I added little introduction. It notes that the construction of the Green function, its series expansion is the main tasks in the study of any operators. Using these results, we can prove the Parseval equality. Thank you for your valuable comments.
<u>Optional/General</u> comments	Introduction is very fine. Writing and language good. I recommend that this manuscript can be accepted for publication after needing revisions.
