

SDI Review Form 1.6

Journal Name:	British Journal of Mathematics & Computer Science
Manuscript Number:	Ms_BJMCS_23821
Title of the Manuscript:	On numerical treatments to solve nonlinear mixed integral equation
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments	This paper introduces a numerical method to solve the nonlinear Fredholm integral equations formulated from a nonlinear mixed integral equation. Both quadratic and Simpson rules are used in the numerical analysis. Simpson rule can get a bit more accuracy approximate solution than Quadratic method. Some application using the presented methods can help to present more applicable of the presented methods. The conclusion need to be written in more compact way.	
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments
