

SDI Review Form 1.6

Journal Name:	British Journal of Mathematics & Computer Science
Manuscript Number:	Ms_BJMCS_25884
Title of the Manuscript:	AN ITERATIVE ALGORITHM FOR ZEROS OF GENERALIZED PHI-STRONGLY MONOTONE AND BOUNDED MAPS IN UNIFORMLY CONVEX AND UNIFORMLY SMOOTH BANACH SPACES
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	The authors present a new study of an iterative algorithm in a Banach space setting. This kind of studies have grown in number during last 2 decades due to the fact that different theories by many authors have been developed. As far as this reviewer is concerned the mathematical background seems correct in a first overview but before continuing with the complete deep study this reviewer urges the authors to add at least an application of the theory to a real problem which the lack of applicability of it.	
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments	Please revise typos and mistakes.
