

SDI Review Form 1.6

Journal Name:	British Journal of Mathematics & Computer Science
Manuscript Number:	Ms_BJMCS_28640
Title of the Manuscript:	Dynamics of capital-labour model with Hattaf-Yousfi functional response
Type of the Article	

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	In page 5, $f(u,v)$ is defined as the Hattaf-Yousfi functional response. However, this definition does not given. Thus, it should be given. Also, this expression could be confused with the function $f(u)$ in page 3. Therefore, one of the variables should be changed.	
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments	In general, the novelty of the manuscript is ok and mathematically clear. However, the contribution of this study to the literature should be discussed more widely. Especially, the advantage of the determined functional response could be discussed more and compared with the other functional responses in the economical meaning. Additionally, if possible the results should be supported with the numerical results and simulations.
