

Journal Name:	<u>British Journal of Mathematics & Computer Science</u>
Manuscript Number:	Ms_BJMCS_28861
Title of the Manuscript:	iCleaner: A Data Cleansing Tool for Outlier Detection in a Data Warehousing Environment
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	Revise Figure 1 and Figure 5 e.g. I think have similar caption but they differ in content! I suggest Figure 1 to be Architecture for Data Cleansing rather than Data Cleansing Framework. I strongly I agree that Figure 5 is what argued to be Data Cleansing Framework.	Corrected accordingly. Proceed.
<u>Minor</u> REVISION comments	Data Cleansing Framework requires an explicit section to elaborate more about the Framework e.g. describe and covered all processes involved during execution of the framework. I believe it's the core of the iCleaner as a tool for data cleansing.	Section 4.1 has elaborated. Proceed.
<u>Optional/General</u> comments	Originality exists so it sounds technically good. The introduction, motivation and background are well presented and covered. But system implementation and deployment lack supportive notes with connection to the implementation of Data Cleansing Framework.	It was optional. No more comments

Reviewer's Comment:

I do appreciate that the author accepted the comments submitted. I recommend for further steps towards publication.
