

SDI Review Form 1.6

Journal Name:	<u>British Journal of Mathematics & Computer Science</u>
Manuscript Number:	Ms_BJMCS_30398
Title of the Manuscript:	Computing the Determinant and Inverse of the Complex Fibonacci Hermitian Toeplitz Matrix
Type of the Article	

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	The authors computed the determinants of the complex Fibonacci Hermitian Toeplitz matrices, and under the assumption that these matrices are invertible; they computed further the inverses of these matrices. A few typos, grammatical errors, or suggestions for improvement were marked directly on the pdf file.	
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments	It would be of interest to show that the corresponding complex Fibonacci Hermitian Toeplitz matrices are indeed invertible.
