**PART 1:** Review Comments

|                                            | Reviewer's comment                                                                                                                                                                                                                         | Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)                                                                     |
|--------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b><u>Compulsory</u></b> REVISION comments |                                                                                                                                                                                                                                            |                                                                                                                                                                                                                                                   |
| <b><u>Minor</u></b> REVISION comments      | <p>All equations should be given equations numbering according to standard practices for easy of reference by readers,</p> <p>The paper would have been more impactful if an empirical result was compared with an existing model (s).</p> | <p><b>We thank you for your careful reading. Some equations have been given number for easy of reference. In Section 7, two special cases (example 3 and example 4) have been provided to show the correctness of the analytical results.</b></p> |
| <b><u>Optional/General</u></b> comments    |                                                                                                                                                                                                                                            |                                                                                                                                                                                                                                                   |
