

SDI Review Form 1.6

Journal Name:	<u>British Journal of Mathematics & Computer Science</u>
Manuscript Number:	Ms_BJMCS_33945
Title of the Manuscript:	Juxtaposition operation to obtain Latin squares
Type of the Article	Short Communication

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	This is an interesting paper. The authors describe an algorithm for obtaining Latin squares of a special kind. The topic in the article is well developed.	All comments have been taken into account
Minor REVISION comments	In p. 2, l. 1 from top, $n \geq 10$ must be $n \geq 11$ or $n > 10$ (see [OEIS]) In p. 2, l. 1 from bottom, $b_1, \dots, b_{n2}$ must be $\{b_1, \dots, b_{n2}\}$ In p. 3, l. 1 from bottom, "renmbre()" may be is "Renombre()" (see the next page) In p. 4, l. 1 from top, what does "N" mean? In p. 4, everywhere in the program, what does "iN" or "jN" mean? In References, [OEIS] " http://oeis.org/A002860 " is duplicated. In References, "K. Yordzhev, K." must be "Yordzhev, K."	All comments have been taken into account
Optional/General comments		Thank you very much for your valuable comments, which have helped to improve the paper.
