

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	British Journal of Mathematics & Computer Science
Manuscript Number:	Ms_BJMCS_33991
Title of the Manuscript:	MATHEMATICAL ANALYSIS OF PLANT DISEASE DISPERSION MODEL THAT INCORPORATES WIND STRENGTH AND INSECT VECTOR AT EQUILIBRIUM
Type of Article:	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
The authors have improved the paper and added more detail in the results and conclusion section as requested. More references have been added. The abstract and introduction have been significantly improved and more work and explanation have been added to the introduction making it more understandable. The equations look fine and the authors have addressed the comments submitted to them explaining the points. As a whole the paper presents the research in a much better way. Now the paper is better suited for publication and can be accepted. If the authors have the chance I suggest improving fig.1's size and layout
