SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments	No	
<u>Minor</u> REVISION comments	<p>In Methodology: Line 62: ...12-point knowledge scale: The readers would be interested in knowing more precisely this scale, include an author of it or make a short description of it. Include author.</p> <p>Line 65 :an 8-point attitude scale: The readers would be interested in knowing more precisely this scale, include an author of it or make a short description of it. Include author.</p>	This query has been addressed
<u>Optional/General</u> comments	This qualitative study of knowledge and attitudes of male staff with regard to infant feeding practices confirms the importance of training male staff on these issues, as they have influence on mothers and can contribute in improving the nutritional status and health children under 5 years. For this reason, after the rise minor observations, I suggest publication of this scientific article.
