

**SDI FINAL EVALUATION FORM 1.1**

**PART 1:**

Journal Name:	<a href="#">British Journal of Medicine and Medical Research</a>
Manuscript Number:	2015_BJMMR_18578
Title of the Manuscript:	Prevalence of Anti-HBcore and HBsAg among health care workers in Public Hospitals, White Nile State, Sudan; 2013
Type of the Article	Original Research Article

**PART 2:**

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<p>There are many English grammar and syntax errors along the manuscript that must be corrected. For example, line 24 in the introduction, the author starts the sentence in the present tense and the in the next line past tense is used. Again, hepatitis virus serological markers are not unified, e.g. HBsAg or HBs Ag are written in the text. Also, anti-HBcore and anti-HB core are observed. Health care workers acronyms was used once (HCWs) but sometimes it is written without the acronyms. There are more words and sentences that need revision.</p> <p>Discussion should be addressed deeper. What was found previously? What is the importance of the authors' findings? There are policies that should be implemented with these findings? Are there limitations in the present study?</p> <p>English grammar and syntax Discussion</p> <p>I included the manuscript with some corrections in red color that need to be revised. Some of these observations are mentioned in the evaluation form, related to English language errors.</p>	<p>Points were considered.</p>
