**PART 2:**

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
The use of ultrasonic activation at different levels?? Conclusion of abstract Inciters?? Substrating flowable sealer??? Language of the article needs serious editing .perhaps from a professional editing service. It is tedious and hard to read	<ol style="list-style-type: none"><li>1. Sir "different levels in conclusion" means that ultrasonic activation was done at different levels of endodontic therapy that is ultrasonic activation was done during irrigation (for final irrigant ) and during obturation ( that is for sealers).</li><li>2. Inciters means trouble makers - in the manuscript I meant saying that pulpal and periapical diseases are primary ones for which microorganisms and their byproducts are inciters.</li><li>3. Substrating flowable sealer sentence has been modified sir.</li><li>4. English editing has been done</li></ol>
