| Journal Name:            | <a href="#">British Journal of Medicine and Medical Research</a>       |
| Manuscript Number:       | Ms_BJMMR_24279   |
| Title of the Manuscript: | FANCONI ANEMIA GENES AND REACTIVE OXYGEN SPECIES IN CANCER DEVELOPMENT |
| Type of the Article      | Review paper   |

**General guideline for Peer Review process:**

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

**SDI Review Form 1.6**

**PART 1: Review Comments**

|  | <b>Reviewer's comment</b>  | <b>Author's comment</b> <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i> |
|--|--|---|
| <b><u>Compulsory</u></b> REVISION comments | In the current review paper, the authors make a detailed check on the role of pathways with the participation of protein products of genes, responsible for the development of Fanconi anemia, in the development of some malignant diseases and disorders. In this connection, the authors make particularly detailed review on two major mechanisms of neutralization the negative effects of the inter-molecular interactions, in which the protein products of these genes participate | OK  |
| <b><u>Minor</u></b> REVISION comments      | In the current review paper, the authors reveal ways for neutralization of the malignant negative effects of oxidative stress, induced by the development of Fanconi anemia, on the one hand, but also relieve of the symptoms of the major pathology, on the other  |   |
| <b><u>Optional/General</u></b> comments    |  |   |
