SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments		
<u>Minor</u> REVISION comments	Ethical line is not good enough for publication. Give enough information for the ethical approval please.	<p>This is a single case report and not a research article involving large number of patients undergoing invasive or special investigations which requires ethical approval.</p> <p>The investigation done (MRI) in this patient is a diagnostic routine non invasive investigation and the surgical procedure performed is also a routine one. There is no identity of patient in the figures or text. Therefore, "ethical approval not applicable" is appropriate.</p>
<u>Optional/General</u> comments
