SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	<ul style="list-style-type: none"> - Please elaborate what author means by symptomatic gallstone? What the symptoms of patients' complaints? Do asymptomatic patients included in this study? - There is a contradiction result between Table 1 and Table 2 about amount of patients following the gender male and female, please clarify about it? Please also mention which statement in text refers to each table. - Please clarify of any improvement of bariatric value by reducing weight or gallstone management by doing these operations hand in hand. - I do suggest to authors to add on others parameters such as any complication peri operative, hospital of stay, cost effectiveness by embark both procedure simultaneously etc 	<p>It means presented with pain, either cholecystitis or biliary colic. i.e it is not an incidental U/S finding.</p> <p>1_Please elaborate what author means by symptomatic gallstone?</p> <p>It means presented with pain, either cholecystitis or biliary colic. i.e it is not an incidental U/S finding.</p> <p>2-What the symptoms of patients' complaints? Do asymptomatic patients included in this study?</p> <p>the symptoms of patients' complaints was pain in the upper abdomen.</p> <p>Yes, asymptomatic patients were supposed to be included in this study, but no cases was found.</p> <p>3- There is a contradiction result between Table 1 and Table 2 about amount of patients</p>
