

SDI FINAL EVALUATION FORM 1.1

PART 1:

| | |
|--------------------------|---|
| Journal Name: | British Journal of Medicine and Medical Research |
| Manuscript Number: | Ms_BJMMR_28835 |
| Title of the Manuscript: | Accuracy of Magnetic Resonance Imaging (MRI) in Detecting Breast Tumors |
| Type of the Article | Original Research Article |

PART 2:

| FINAL EVALUATOR'S comments on revised paper (if any) | Authors' response to final evaluator's comments |
|--|---|
| <p>Regarding "Details about histology results and how it was obtained for the participants, was added to the article in [Page 2- Lines 68 to 76] in the Material and Methods Section.", no such details can be found in the revised version, same for "(5)Ultrasound and Mammography were described in detail in [Page 2- Lines 62 to 67] in the Material and Methods section of the article." I would like to suggest that the authors create separate heading for US, Mammo and Histology in the Material and Method section.</p> <p>Section of "Statistical Analysis" provide the info of statistical software. What's more important to describe the statistical method used and the rationale.</p> | <ul style="list-style-type: none"> - Separate headings for Mammography, Ultrasonography and Histology procedure were created in the "Material and Methods" section of the manuscript [Page 2-Lines 48 to 70]. - Description of the statistical method used and the rationale were added to the "Material and Methods" section [Page 3-Lines 97-102], where the authors add the followings: 1/ Type of the study was prospective cohort study. 2/ Accuracy was represented using the terms sensitivity, specificity, and overall accuracy. 3/ As P-value is a function of the observed sample results relative to a statistical model, which measures how extreme the observation is, a P-value ≤ 0.0001 was considered to be significant. |
