SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	<p>1. Major revision of syntax and English expression (Native reviewer)</p> <p>2. Results: There are no figures of CT examination. Why the authors did not use a CT or MR angiography for preoperative planning?</p> <p>3. Discussion: The authors should discuss the proper diagnostic modality for preoperative planning. Why did they use digital angiography? They should discuss the advantages and disadvantages of each modality.</p> <p>4. Discussion: the authors selected surgery. Recently, many authors have advocated preoperative embolization of the carotid body tumour. They could discuss why they did not select it and potential indications.</p> <p>5. Discussion: The authors mention the Shamblin classification. This is a histological classification. What other radiological classifications could be used preoperatively?</p>	
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments
