

SDI Review Form 1.6

Journal Name:	British Journal of Medicine and Medical Research
Manuscript Number:	Ms_BJMMR_24556
Title of the Manuscript:	FUSARIUM INFECTION AFTER ALLOGENEIC STEM CELL TRANSPLANTATION WITH PROLONGED NEUTROPENIA
Type of the Article	Case study

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	This is a well written paper showing how a fusarium infection could be successfully treated by a combination of liposomal anpho-b and voriconazole. Authors should explain why after the second HSCT failure they do not use the autologous back-up ie risk of disease relapse...and why they choose another donor for the third HSCT ie permissive HLA mismatch or Authors have also to clearly report the stem cell source PBSC or BM as per each transplants.	<p>Firts of all, we thanks a lot to reviewer.</p> <p>. We forgot to add to use autologous back-up and so we added this sentences in text.</p> <p>. We think that after second SCT, he had graft failure and we have no another option to treat him, because he had pancytopenia and also had infexious disease and so we choose another donor for TX.</p> <p>. We added source of stem cell in text and we used peripheral blood stem cell for each Tx.</p>
<u>Minor</u> REVISION comments	Please check if nucci (line 85) is or not capital	We corrected Capital letter N instead of n
<u>Optional/General</u> comments
