<p>As previously recommended by this referee, the authors need to calculate the retention index to confirm identification using the NIST database. This parameter (retention index) also must be included in the reported tables that describe compound identification.</p> <p>Recommended referenes: H. van Den Dool, P. Dec. Kratz, A generalization of the retention index system including linear temperature programmed gas—liquid partition chromatography, <u>Journal of Chromatography A</u>, Volume 11, 1963, Pages 463-471</p>
