

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	British Microbiology Research Journal
Manuscript Number:	Ms_BMRJ_19952
Title of the Manuscript:	MICROBIOLOGICAL EXAMINATION OF HOUSEHOLD KITCHEN SPONGES FROM THREE COMMUNITIES IN IKWUANO L. G. A, UMUAHIA, ABIA STATE NIGERIA.
Type of Article	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
For abstract , it should be written as follow: Aims: Study design: Place and Duration of Study: Methodology: Results: Conclusion: This an article example published by the same journal : Anakwenze et al (2014). Improved Cultural Conditions for Methionine Accumulation in Submerged Cultivation of <i>Bacillus cereus</i> S8. British Microbiology Research Journal. 4(8): 885-895. In line 126 in the corrected manuscript change Mattick, Durhaman, Dominigue, Jorgensen and Schaffner by Mattick et al., (because there are more than 2 authors). From line 133, to line 135, ideas are repeated and punctuation is very confusing thus they should be <u>reformulated</u> (Scott and Bloomfield [12]. Relationship between bacterial contamination of countertops and cleaning cloths had been studied [13]. studied the relationship between bacterial contamination of countertops and cleaning cloths). In line 209, change “fibre” to “fiber”. In references, authors should not write names of journal in italics. Remove “and”; “of”; “in” and dots from names of journals. In internet, there are many sites showing how to write names of journals correctly. You are right, there is no table 8, but there is a table without being attributed to a number which the name is “Interpretative reference range code”. Thus this last “table without any number” should be removed since table 7 contains information about resistance, sensibility vis à vis antibiotics used.	The correction has been effected. The confusion caused by mis-punctuations have been rectified accordingly. “Fibre” has been changed to “fiber”. Corrections have been put in places needed. Comment carried out.
