

SDI Review Form 1.6

Journal Name:	British Microbiology Research Journal
Manuscript Number:	Ms_BMRJ_20518
Title of the Manuscript:	BIOLOGICAL CONTROL OF FUSARIUM OXYSPORUM F. SP. VASINFECTUM ISOLATED FROM IVORIAN COTTON BY TRICHODERMA SPP
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	It is very difficult to say that this work belongs to biological control studies, because in case of biological control it must contain at least some pot experiments , but this work has not any studies as pot experiment. Therefore, I suggest that the author have to change the title of this MS to be (as example): In vitro studies on the action of different Trichoderma spp. on growth of Fusarium oxysporum f.sp. vasinfectum the causal agent of cotton wilt.	The suggestion of the reviewer's relevant and we believe and agree to change the title. Penson this we better stick with the manipulation performed. thus, the title becomes now: <i>In vitro studies on the action of different Trichoderma spp. on growth of Fusarium oxysporum f.sp. vasinfectum the causal agent of cotton wilt</i> the new title is highlighted in yellow in the manuscript
<u>Minor</u> REVISION comments	Non	
<u>Optional/General</u> comments	Non
