SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	1-Well written manuscript. This is a study about HP. 2- "HP may cause various gastric pathologies but not only gastric cancer". I suggest below two studies for the references.(Minerva Chir. 2014 Jun;69(3):147-53.) and (Case Rep Gastroenterol. 2008 Sep;2(3):469-73. doi: 10.1159/000175414.) 3- I think the first paragraph of materials methods is wrong. Please correct it.	1- We appreciate your opinion. 2- Other gastric pathologies were reported and highlighted in the manuscript. About the mentioned two studies. We read them carefully. But, they could not provide relevant data to our work. As the first study asses the albumin level and metastatic lymph node ratio as a new prognostic strategy for gastric carcinoma.The second study asses endoscopy or surgery as curative method for Dieulafoy lesion that cause severe gastrointestinal system hemorrhage. 3- The first paragraph in quantitative real time PCR and other following paragraphs were modified, rearranged and highlighted.
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments
