

SDI Review Form 1.6

Journal Name:	British Microbiology Research Journal
Manuscript Number:	Ms_BMRJ_27557
Title of the Manuscript:	QUALITY AND MICROBIAL ASSESSMENT OF WATER USED BY THE RESIDENTS OF KABIANGA FROM THE DIFFERENT SOURCES
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	This is an original research article which provides useful information for public health in third world countries. The study examines the water quality that is being used by the people of Kabianga. Researchers used the model of a typical pathogen: E. coli which is related with major water contamination. The authors used simple biochemical features of pathogens in order to identify them easily. The tables and the figures are comprehensible. I believe that this article could be a great tool for the public health community in order to avoid future waterborne outbreaks.	Thanks, the results indeed are important for policy makers.
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments
