PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	nill	
Minor REVISION comments	Mention smoking pack years. Cardiac enzymes reach the peak in 12 hours, you can mention the time in which this test was done.	Pack years calculated, by multiplying the number of years of smoking by the average number of cigarettes smoked per day and dividing by 20; of course we will add it. Great thanks
Optional/General comments	Very well written
