SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The article is aimed to determine the acute effects of tobacco smoke on hemodynamics in black male adolescents in Lusaka, Zambia. The title is "Haemodynamic Responses to Tobacco Smoke Inhalation in Male Adolescents in Lusaka, Zambia". I have some questions. The authors should to clarify and add the following issues in the text. 1. The sample size of the study is relatively small. 2. This study is also a retrospective study. 3. Several factors influence the outcomes of the study. Some limitations might be occurred. 4. There was a wide variability of smoking parameters including number of cigarettes smoked per day, duration of smoking and the starting age of smoking. 5. Please add the limitations of the study in the discussion section. 6. The clinical application of the study is very important. The authors should to recommend the readers "How to apply this knowledge into routine clinical practice".	
Minor REVISION comments		
Optional/General comments
