

SDI Review Form 1.6

Journal Name:	Cardiology and Angiology: An International Journal
Manuscript Number:	Ms_CA_38020
Title of the Manuscript:	Clinical Significance of Creatine Kinase-MB Elevation in Patients with Chronic Kidney Disease before initiation of Hemodialysis
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The main weakness of the manuscript is in the Conclusions. The paper reflects a high correlation CK-MB-albuminuria, which is a strong predictor of CV events in CKD and non-CKD pts. However, in this study, data related to CV events or Biomarkers of cardiac function were not included. Authors should be fixed this critical item.	Thank you for your valuable comments. The study is a cross-sectional study; data within this scope that relates high CK-MB levels with cardiovascular risk factors have been included (Table 4). The conclusions have been modified.
Minor REVISION comments	None	
Optional/General comments
