PART 1: Review Comments

|                                     | Reviewer's comment                                            | Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
|-------------------------------------|---------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Compulsory</b> REVISION comments | Change the title of manuscript without changes of the content | Thank you for your very valuable comments.<br><br><ol style="list-style-type: none"><li>1. The title of the manuscript has been changed.</li><li>2. The aim of the study has been changed in the abstract and introduction.</li><li>3. Place and duration of study has been moved to methodology in the abstract (lines 13 – 14).</li><li>4. Abstract results have been reported from table results.</li><li>5. Abstract conclusion has been edited and last two lines deleted.</li><li>6. Definition of variables has been moved to section 2.5 under method.</li><li>7. The sentence <b>Twenty-seven (22.5%) diabetic patients had microalbuminuria</b> is in result section (line 127).</li></ol> |
| <b>Minor</b> REVISION comments      |                                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| <b>Optional/General</b> comments    |                                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
