| <b><u>Compulsory</u></b> REVISION comments | <p>The results of present manuscript are pertinent. Standards assays methods were utilized.</p> <p>I felt lack of a better interrelation between inummo system and moderate exercise because it is known that the inummo system have a significant role in intense having exercise. But, in moderate exercise this issue still little addressed.</p> <p>Thus, I suggest only reinforcing this interrelation in introduction and discussion topic.</p> <p>However, despite that little revisions needs I recommend the publication of this manuscript in Cardiology and Angiology: An International Journal.</p> <p><b>Ethical issue:</b><br/>The study was approved by ethical committee of Institution.</p> | <p>Thank you for the recommendations.</p> <p>This has been related. Thank you for the recommendations.</p> <p>The study was approved by the Ethical Committee of the Institution Teaching Hospital managing ethical approval issues for the institution.</p> |
| <b><u>Minor</u></b> REVISION comments      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                                                                                                                                                                                                                                              |
| <b><u>Optional/General</u></b> comments    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                                                                                                                                                                                                                                              |
