

SDI Review Form 1.6

Journal Name:	Current Journal of Applied Science and Technology
Manuscript Number:	Ms_CJAST_36888
Title of the Manuscript:	Drainage Investigations for the Design of Water table Management Systems in AEC&RI, Kumulur, Trichy District, Tamil Nadu
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments	The paper is briefly based on a research work in which the author(s) deal with a water table management system, as considering controlled drainage and the location of AEC&RI, Kumulur, Trichy District, Tamil Nadu in detail. From a general perspective, the paper seems having a remarkable subject and value in research flow. But before it can be published in the CJUST, some major revisions indicated as follows should be done: 1- The Introduction sections is very short. It should be improved by explaining more about background, research objectives, and organization of the paper. 2- All the equations should be numbered in the same style. 3- Figure captions should be provided separately as texts and with the same style – numbering flow along the content. 4- A total of 5 references for such paper is very low. I suggest including around at least 25-30 references by including also some recent ones from 2015, 2016, and 2017. Thanks the author(s) for their valuable efforts to form this paper.	1-Improved the introduction section and abstract along with the following objectives 2- Rearrange the equation in same style 3-Corrected 4- Very few more research based on design of water table management system. so I include only 4 more references
<u>Minor</u> REVISION comments	-	
<u>Optional/General</u> comments	-
